

HumTripWale

Premium Travel Experience Platform

1. Executive Summary

Project Name

HumTripWale – Premium Travel Experience Platform

Purpose

HumTripWale aims to build a modern, scalable, high-performance travel platform inspired by the premium design language of Avian Experiences while offering a much richer booking ecosystem.

The platform will enable users to discover, compare, and book curated travel experiences across India and international destinations with a seamless booking journey.

Business Objectives

- Increase online bookings
 - Reduce manual operations
 - Automate customer journey
 - Build premium brand identity
 - Generate qualified travel leads
 - Improve SEO rankings
 - Centralize operations
 - Scale globally
-

Target Audience

- Solo Travelers
- Couples
- Families

- Corporate Groups
 - Backpackers
 - Adventure Travelers
 - Honeymoon Travelers
 - International Tourists
-

2. Project Vision & Goals

Vision

To become India's most premium travel experience platform by offering beautifully curated journeys through technology.

Mission

Deliver unforgettable travel experiences while making trip planning effortless through a world-class digital platform.

Goals

Business Goals

- Increase website conversion rate
 - Reduce booking time
 - Generate direct bookings
 - Reduce OTA dependency
 - Increase customer retention
 - Build travel community
-

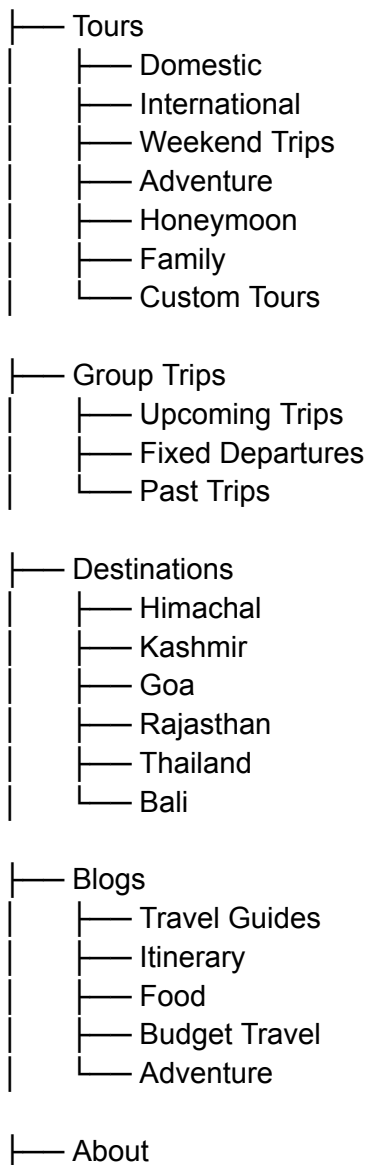

Technical Goals

- SEO Friendly
- Mobile First

- Super Fast
 - Secure
 - Scalable
 - Modular Architecture
 - API First
-

12. Functional Requirements

12.1 User Authentication

Features

- User Registration
- Login
- OTP Verification
- Email Verification
- Forgot Password

- Reset Password
 - Social Login (Google)
 - Session Management
-

12.2 Homepage

The homepage should include:

- Full-screen video banner
 - Destination search
 - Featured destinations
 - Trending trips
 - Upcoming departures
 - International packages
 - Weekend getaways
 - Customer reviews
 - Blogs
 - Instagram feed
 - Newsletter
 - Footer
-

12.3 Tour Listing

Users should be able to

- Search packages
 - Filter by
 - Destination
 - Budget
 - Duration
 - Month
 - Trip Type
 - Difficulty
 - Sort
 - Popular
 - Price Low to High
 - Price High to Low
 - Latest
-

12.4 Tour Details

Each package should include

- Images
 - Video
 - Tour Overview
 - Duration
 - Starting Point
 - Ending Point
 - Itinerary
 - Inclusions
 - Exclusions
 - Hotels
 - Transportation
 - Meals
 - Packing List
 - Gallery
 - FAQ
 - Reviews
 - Related Trips
-

12.5 Booking System

Users should be able to

- Select Departure Date
 - Select Travelers
 - Add Extra Services
 - Apply Coupon
 - Pay Online
 - Download Invoice
 - Receive Email Confirmation
 - Receive WhatsApp Confirmation
-

12.6 User Dashboard

Features

- Booking History
 - Upcoming Trips
 - Cancelled Trips
 - Wishlist
 - Saved Travelers
 - Profile
 - Change Password
 - Download Invoice
-

12.7 Admin Panel

Modules

- Dashboard
 - Tour Management
 - Bookings
 - CRM
 - Blogs
 - Payments
 - Users
 - Reviews
 - SEO
 - CMS
 - Reports
 - Coupons
-

13. Non-Functional Requirements

Performance

- Page Load < 2 seconds
 - API Response < 500 ms
 - Lighthouse Score > 90
 - Core Web Vitals Pass
-

Availability

- 99.9% uptime
 - Auto Backup
 - Auto Recovery
-

Scalability

System should support

- 10,000 concurrent users
 - 100,000 monthly visitors
 - Millions of records
-

Reliability

- Automatic retry
 - Error logging
 - Monitoring
 - Crash reporting
-

Compatibility

Supported Browsers

- Chrome
- Safari
- Firefox
- Edge

Supported Devices

- Mobile
 - Tablet
 - Desktop
-

22. Future Scope

Phase 2

- Android Application
 - iOS Application
-

Phase 3

- AI Trip Planner
 - AI Chat Assistant
 - Personalized Recommendations
-

Phase 4

- Hotel Booking Engine
 - Flight Booking
 - Bus Booking
 - Visa Services
 - Travel Insurance
-

Phase 5

- Affiliate Portal
 - Vendor Portal
 - Travel Agent Panel
 - Partner Dashboard
-

Phase 6

- Loyalty Program
- Referral System
- Membership Plans

- Rewards & Cashback
-

Phase 7

- Multi-language Support
 - Multi-currency Support
 - International Expansion
 - White-label Travel Platform
-

Phase 8

- **Goa Concierge Platform** (integrated with your My Crew ecosystem)
- Local Experiences Marketplace
- Event Booking
- Restaurant Reservations
- Rental Services
- Smart Itinerary Builder
- AI Travel Concierge
